...UP TO NURSING INSTITUTE LE ROUVRAY...

The Nursing Institute Le Rouvray opened its doors in 1972 at the Hospital Center Le Rouvray. The Institute trained first psychiatric nurses. After the reform of the nursing studies in 1992 and the signature of the Bologna Process, the Institute started to train students in general nursing.

In 2015, the Institute moved to the new building with modern facilities including a 100 m² space for simulation in health reproducing a hospital service. Our equipment of the newest generation allows the simulations of high fidelity during the 3 years of studies.

We accept about 100 students a year.

The Institute is situated in the big, pleasant green area in the heart of the Rouen Conurbation.

The respect and the goodwill are two values which guide the teaching and the administrative staff in their job. The academic staff is composed of specialists in different nursing areas.

Since 2009 the Nursing Institute Le Rouvray is affiliated with the University of Rouen.

Language skills

The teaching is exclusively in French so you need to be able to follow it. If you wish to come for a practical training, the knowledge of the French language is highly recommended because the communication is in the core of nursing. However, in some particular places, a good level of English could be sufficient.
